SUMMARY

Senior product leader who takes products from strategy through launch and proves impact on growth, retention, and revenue. A strategic, deeply technical PM who connects UX, code, and data to solve problems fast: grew a consumer health platform from \$100K to \$1.8M ARR, drove self-serve signups 270% with activation from 8% to 25%, and scaled experimentation velocity across teams. Now improving conversion for new cancer patients at Memorial Sloan Kettering. Equally at home with ambiguous 0-to-1 bets and optimization at scale.

SKILLS

Product Management: Product Strategy, Product Vision, Roadmap Ownership, Roadmap Planning

Growth & Experimentation: Funnel Optimization, Growth Loops, Growth Strategy

Analytics & Tools: Amplitude, Mixpanel, PostHog, SQL, Segment CDP

AI & Orchestration: Agentic AI, LLM Integration, Multi-Agent Systems, Prompt Engineering, RAG, Workflow Automation

Technical: API Design, API Integrations, Event-Driven Architecture

EXPERIENCE

Principal Product Manager (Consultant) | Web Optimization

Memorial Sloan Kettering Cancer Center, Remote | Mar 2026 - Present

- Improving conversion for new patients by ~20%, or helping thousands of new patients annually
- Increasing experimentation velocity and decreasing time to learnings from multiple months to weeks
- Creating a Web Optimization Strategy mindset and defining experimentation best practices for mskcc.org

Principal Product Manager (Consultant) | AI & Growth

GetHealthy.com, Austin, TX | Nov 2025 - Dec 2025

- Led launch of multi-agent AI orchestration system with 5 specialized agents that independently interpret user intent, reason through complex workflows, and execute tasks autonomously across systems
- Defined product vision for agentic work management: task routing, agent handoffs, persistent context, and human-in-the-loop escalation paths
- Worked backwards from customer goals (care management, patient engagement) to shape roadmap priorities and innovation bets

Staff Product Manager | Growth

ZenBusiness, Inc., Austin, TX | Jan 2025 - Sep 2025

- Built new self-serve acquisition funnels beyond core LLC product, creating customer entry points that drove 8% conversion lift (~1,500 new customers/day)
- Scaled experimentation velocity 250% by establishing testing infrastructure, prioritization frameworks, and best practices across multiple teams
- Integrated AI capabilities (Velo) into front-end tooling, improving funnel starts 70% through rapid experimentation and iteration

Head of Product

Wellcore, Austin, TX | May 2023 - Sep 2024

- Drove meaningful business impact: grew ARR from \$100k to \$1.8M, increased customer acquisition 1150% YoY, reduced churn 60%, improved LTV 112%
- Set product vision and strategy for B2C SaaS platform, owning full product lifecycle from 0→1: build, grow and scale
- Built workflow orchestration system coordinating tasks across patients, providers, labs, and pharmacies, automating multi-step processes that previously required manual intervention

Principal Product Manager | Growth

Mattemost, Austin, TX (Remote) | Nov 2021 - Feb 2023

- Owned acquisition and activation for cloud collaboration platform, driving self-serve signups 270% and Day 14 activation from 8% to 25%

- Established Growth Tiger Team spanning Product, Engineering, Marketing, and Sales to align growth loops and resolve cross-functional friction
- Defined KPIs and built dashboards to measure product success; made data-driven prioritization calls even with imperfect data

Web Optimization Manager

Indeed, Austin, TX | Jul 2018 - Nov 2021

- Built scalable SaaS experimentation platform serving 5 internal teams; increased testing velocity 600% and win rate 150%
- Mentored experimentation practitioners across teams, building testing culture and analytical rigor at scale

Optimization Director

Clearhead / Accenture Interactive, Austin, TX | Jan 2017 - Aug 2018

- Led cross-functional teams through full product lifecycle; delivered 400+ experiments with 36% win rate and 10x ROI
- Shipped SONOS checkout redesign generating \$12MM YoY revenue impact, from conception through launch
- Managed multi-disciplined teams (4-8 Designers, Developers, Analysts) across 15 enterprise client engagements

PROJECTS

- Built Squabble Inn, a social audiobook and bookclub mobile app, on React Native + Expo with Firebase backend, shipping cross-platform iOS and Android from a single codebase
- Designed mobile-first social reading experience with comment threads, listening quests, and shared progress, targeting multigenerational audiences who want to read alongside friends and family
- Architected product with AI-assisted development workflows end-to-end: Claude Code for implementation, design iteration, and TestFlight release management, treating AI as a first-class collaborator across discovery, specs, and ship
- Led 0→1 consumer mobile build from concept through TestFlight, owning product vision, UX flows, Firestore data model, and release engineering as a solo builder
- Built AI-powered career management CLI (github.com/dontoisme/job-journal) with JD-aware resume optimization, keyword-matched bullet ranking, and automated job monitoring pipelines
- Built agent-commerce, an LLM payment infrastructure layer that adds CLI payment confirmation for AI agents, in TypeScript and Swift

EARLIER EXPERIENCE

Product Manager

SpareFoot, Austin, TX | May 2015 – Nov 2016

Product Manager / Designer / BPM Consultant

IBM, Austin, TX | Jul 2011 – May 2015

EDUCATION

Bachelor of Business Administration | University of Oklahoma, Norman, OK

Double Major: Entrepreneurship/Venture Management and Finance
